## **DETAILED ACTION**

### ***Drawings***

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13, 18, 23, and 29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite an improper Markush group. LDPE, HDPE, and PP should be listed in the alternative.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3728

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al (US 2002/0058049 A1) in view of Fehn (US 6,194,043) and Groeger (WO 01/51222 A1).

Regarding claim 1, Wong et al discloses a medicinal preparation in a plastic container (see for example, the abstract). Wong et al lacks, or does not expressly disclose, a fluorinated barrier layer.

Fehn discloses that it was known in the art at the time the invention was made to place a fluorinated barrier layer in a container to inhibit cross contamination. Groeger discloses that it was known in the art at the time the invention was made to use fluorinated polymer for the storage of medicinal components. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the container of Wong et al from a fluorinated polymer, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

As to claims 2-4, 7 and 8, Wong discloses the claimed medicinal preparation.

Art Unit: 3728

As to claims 5 and 6, Fehn discloses the claimed materials in a small volume bottle.

Regarding claims 9-16, the package of Wong-Fehn-Groeger discloses the claimed methods by presentation

While claims 17-33 are directed towards particular methods for increasing stability, preventing loss of an ingredient, or reducing transfer of an impurity, the only method steps presented are the provisions of the structures of claims 1-8. As such, the method of Wong-Fehn-Groeger, as applied to claims 9-16, discloses the claimed invention.

### ***Conclusion***
